Jonathan Edwards, VP, Product Development

Washington, DC, March 11, 2003 – Globalization Partners International (GPI), a provider of website, software and documentation globalization services, has localized YnotLearn’s new suite of eLearning tools into Spanish, Portuguese, and French. YnotLearn is one of the only eLearning firms providing a single, integrated system that is completely browser-based. The YnotLearn solution enables organizations to create, deploy, customize and manage the delivery of web-based training and education, both inside their organization on their internal intranet or the Internet. YnotLearn’s eLearning tools consist of a suite of products which include YnotAssess, YnotPublish, YnotEdit, YnotManage, and YnotServices.

“GPI worked with YnotLearn on all aspects of their localization effort, from initial internationalization consultation and localization of their tool suite, through online quality assurance and testing of their web-based demos and products,” says Martin Spethman, GPI’s Managing Partner.

“Our account team at GPI provided solid guidance and services for the globalization efforts of our suite of eLearning management tools,” says Jonathan Edwards, YnotLearn’s Vice President of Development. “Our tools are completely Web-based and we required both the linguistic and the internationalization and localization engineering skills to handle the five target languages as well as the architectural issues required to deliver our applications over the Internet.

About Globalization Partners International: www.globalizationpartners.com
